Hardware Identification Sheet

Student Name: __Jose Degales_____

Date: _____10/28/26_____

Instructions

Using your computer, identify the hardware listed below and record the information.

Hardware Component	Information
Computer Manufacturer	Major global computer manufacturers include Lenovo, HP, Dell, and Apple, which together capture over 60% of worldwide PC and laptop sales
Computer Model	A computer is a digital program or mathematical representation designed to simulate real-world systems, behaviors, or scenarios using data and algorithms
Operating System	operating system (OS) is core system software that manages computer hardware and software resources, serving as an intermediary between users, applications, and physical machinery.
CPU (Processor)	A central processing unit (CPU) is the main "brain" of a computer that executes program instructions, performs calculations, and manages data flow across all system components
Installed RAM	Installed RAM refers to the total physical amount of Random Access Memory (RAM) chips or modules currently placed into the memory slots on a computer's motherboard
Storage Device	A storage device is any hardware component or digital media used to record, retain, and retrieve data
Storage Capacity	Storage capacity is the total amount of digital data a device like a hard drive, solid-state drive (SSD), or

	smartphone can hold, measured in units such as gigabytes (GB) and terabytes (TB)
Network Adapter	network adapter (also known as a Network Interface Controller or NIC) is a hardware component that allows a computer, laptop, or electronic device to connect to a wired or wireless network.
Monitor	A computer monitor is an output hardware device that displays visual information such as text, images, videos, and graphical user interfaces generated by a computer's video card or graphics processing unit
Keyboard	A computer keyboard is a peripheral or built-in input device modeled after a typewriter that translates physical key presses into electronic scan codes for a computer or device
Mouse	A computer mouse is a small, handheld hardware input device used to control a cursor or pointer on a computer screen

Available Ports

Check all that apply:

☐ USB-A

☐ USB-C

☐ HDMI

☐ DisplayPort

☐ VGA

☐ Ethernet

☐ Audio Jack

☐ Other: _____

Connected Peripherals

List any connected peripherals.

- Go to **Start > Settings > Bluetooth & other devices** (or **Devices & printers** in Control Panel) to view active monitors, audio gear, keyboards, and mice.
- **PowerShell Command:** Run Get-PnpDevice -PresentOnly | Where-Object { $_.InstanceId -match '^USB' } in PowerShell or Command Prompt to list active USB hardware.
- **Device Manager:** Press Win + R, type devmgmt.msc, and open **View > Show hidden devices** to see current and past hardware. [1, 2, 3, 4]
